THE WORLD IS WAKING UP

"I think that's a great message. I don't think the Communist Party of China is just going to fold up and walk away willingly. It's a criminal organization that has taken control of a country. They're not going to leave of their own accord. They're going to have to be forced out of authority and out of power one way or the other."

- Scott Perry,
United States Congressman

"We are talking about an evil government. Chinese people are suffering so much. Millions are tormented by abuse, exile, imprisonment and even murder. It is not a party, it is not a government, it is a terrorist organization, which has ruled cruelly for more than seventy years. That is why the signatories to the End CCP petition are certainly right."

- Rabbi Shlomo Aviner
Head of Educational Institute Ateret Yerushalayim

"The Chinese Communist Party is not satisfied with destroying freedom and repressing its citizens within its own borders. Beijing has continually encroached upon American sovereignty to spy, intimidate, and harass not only defectors, but even American citizens"..."To be clear, our adversary is not the Chinese people, but the threat that comes from the tyrannical regime that oppresses its own people, commits genocide, censors speech, and seeks to undermine representative government. It is important we remain clear-eyed about the threat the CCP poses to the security of the American people so we are prepared to counter its malign influence at every turn."

- Mark Green
Chairman of US Committee on Homeland Security

IT'S TIME TO END THE CCP

The Chinese Communist Party does not limit its destruction to China alone. It has always been working to spread the poison of communism beyond its borders, undermining morality, faith, and freedom wherever its influence reaches. The CCP's cover-up of COVID-19 led to a global catastrophe, costing countless lives and devastating economies worldwide. Its subversive tactics infiltrate foreign institutions, erode individual freedoms, and enable corruption. Evil does not restrain itself, nor will it stop willingly. To remain silent in the face of such tyranny is to enable further crimes. It is the duty of every individual who values justice and human dignity to demand an end to the Chinese Communist Party.
